

Studywiz 9.4.1 Release Notes

00.01, 17 Jul 09

New Features in Studywiz 9.4.1

The new features listed below are included in Studywiz 9.4.1.

Category	Summary	Incident
3rd Party Integration	Secure LDAP - Allow Studywiz to authenticate using LDAP over a secure link Studywiz can now authenticate users against Active Directory using LDAPs (Secure LDAP).	
eLocker	Make icon in eLocker/Shared eLocker download action rather than edit [Hampshire] When you click a file icon in the eLocker, the file is now downloaded rather than edited	111492
GradeBook	Markbook - School Year Configuration In Studywiz Assessment Plus, Global Administrators can now set up a school year by specifying dates for semesters, terms and weeks.	
Import/Export	Consortium Update tool - Create "A General Class" under the selected school, rather than "A General Level" If users are imported with no Classes specified, they are now placed in 'A General Class' in their own school, rather than in 'A General Level'.	
MarkBook	MarkBook - Role Types Additional user roles can be set up as needed to meet the client requirements.	

Bugs Fixed in Studywiz 9.4.1

Bus Fixed – Found in Previous Versions

Changes listed in this section resolve issues found in versions prior to Studywiz 9.4.1. Changes listed in this section will be included in Studywiz 9.4.2, due for release in the third quarter of 2009.

Category	Summary	Incident
Admin	SIMS Integration - Phase 1 - problem with username appendage [Hampshire] When importing a set of user-files, even when the user name contained in the file is unique, the importer is still appending a suffix. Two different behaviours are now possible when users are imported. The system can be configured so that a user name appendage is added regardless of whether or not the username is unique, or can be set so that if the user name is unique, no appendage is added.	109448
Admin	Users' 'Default Level' - Users can now have a default level defined in data imports.	
Admin	Scheduled Importer – Fixed error occurring when importing Level data	
Admin	Studywiz password length (5 characters) isn't valid for new GMail accounts (6 characters). Passwords are now 12 characters.	
Admin	Make GMail email address more visible throughout Studywiz. The Admin interface now displays users' gmail addresses or 'no google account'.	

Category	Summary	Incident
Blog	Elementary/Blogs - If you have a Blog entry bookmarked, entering bookmarks in Primary/Elementary gets a PU. Blog bookmark access now works correctly.	
Blog	Update Blog settings The default number of users able to see a student's Blog is now 5000.	
Browsing content	MP3 files cause browser to crash when viewing General Content page in Primary sub-folder/section [Hampshire] Serving of MP3 files has been updated to work in IE, FF and Safari, whether or not session cookies are enabled.	111650
Browsing content	Manage Class feature allows a teacher to search for any class deployment-wide [Hampshire] Teachers can now search for classes in their own school only.	111316
Browsing content	Classes Freezing [Tintern] Caused by IE6 not handling menus correctly. HTML altered to work with IE6.	112500
Browsing content	IE6 - scrollbar is always visible - covering messages scrollbar. Modification made so that scrollbar appears correctly in IE6.	
Browsing content	Student submit assignment get a PU if the upload file doesn't save System now handles the case where the user starts to upload a file but then goes back without saving.	
Browsing content	User Registration - PU editing configs. Editing new user registration configurations no longer causes a page unavailable error.	
Browsing content	Progress Overview - School Chart gets a PU Attempting to view a School Chart no longer produces a page unavailable error.	
Browsing content	Learning menu goes all weird in IE 6/7 when menu contains many items. [Hampshire] Skinpack configuration has been updated so that the menu now appears correctly	
Calendar	Barnsley - Calendar Weekly view days/dates don't match up A problem with different locales having different days (Sunday/Monday) set on the server as the first day of the week has been resolved. Studywiz now takes Sunday as the first day of the week instead of relying on server settings.	106843
Channels	Assignment Submissions etc don't display in Student Progress overview if unpublished Unpublished Assignment submissions and submissions outside the date range now appear in the Student Progress Overview	107178
Elementary /Primary	Reporting and setting icons in Primary and Standard are different Reporting and Settings buttons in Primary and Standard now use the same icons.	
Elementary /Primary	Multiple folders can still be made 'current' in Primary [Hampshire] Only one folder at a time can be set as 'Current'.	112050
Elementary /Primary	The Primary report pages open with standard Studywiz graphics. Primary reporting now has an updated primary-style skinpack	
eLocker	Security hole - renaming items in eLocker Users can no longer move eLocker items via the web interface by renaming.	
eLocker	Hampshire - eLocker - Can't edit file names. Users can now edit the filenames of items in their eLocker.	
ePortfolio	ePortfolio - Complicated settings to enable/disable eportfolio for users in true & false levels. Enabling ePortfolio for levels and individuals has been simplified.	

Category	Summary	Incident
ePortfolio	ePortfolio - add a note if Collection verification is automatically removed If a Collection becomes unverified due to changes in its contents, a reflection is added to indicate why the verification was removed.	
ePortfolio	ePortfolio - IE6 - Collection name is cut off at the top The spacing of Collection names has been adjusted to appear correctly in IE6.	
ePortfolio	ePortfolio - Adding a record - already exists text wraps too early. The 'Record is already in this section' text has been adjusted to fit more neatly.	
ePortfolio	ePortfolio - Record Evidence - removing the file then trying to view the evidence file opens a new studywiz tab. If Evidence is removed from a Record, the Evidence button no longer appears.	
ePortfolio	ePortfolio - Editing & downloading an evidence file opens it in the same page/tab. Evidence now opens in a new page or tab and does not take over the active window.	
ePortfolio	ePortfolio - Learning Plans - You can't delete question comments. Users can now delete their own comments from Action/Learning Plan questions.	
ePortfolio	Hampshire - Public ePortfolio Collections cannot display Repository Images Images in ePortfolio Collections viewed outside of Studywiz now appear.	112398
ePortfolio	Eportfolio: Html Export, error page when try to download an evidence which doesn't have a file attached. For ePortfolio Evidence that doesn't have a file attached, the download button no longer appears.	
ePortfolio	Eportfolio: adding evidence from eLocker or uploading file does not give warning for verifications. When a user adds Evidence to a verified Record, they are now warned that the verification will be removed from the Record.	
ePortfolio	ePortfolio - A teacher can assign a student's collection to be visible to classes the student isn't even in. Teachers can now only make a student's collection visible within the student's own Classes and Groups.	
ePortfolio	ePortfolio - Students can't assign their collections to groups they are not a teacher in. Students can now assign their collections to groups in which they are either a teacher or student.	
Folders	Folders - Teachers don't get the individual or team folder icons when viewing these folders. Individual and Team Folders now show the correct icons.	
Folders	Folders - Team & Individual folders don't show where they are located in Admin Folder Search In the Admin interface, Team and Individual folders now display which Class or Group they are in.	
Folders	Elementary - Sub Folders - Sort Order incorrect Subfolders are now displayed in alphabetical order rather than in the order in which they were created. If they have been manually reordered, they retain their custom ordering.	
Gallery	Gallery doesn't recognise AVI files as video/embeddable Avi is now a supported video file type in the Gallery, and has an AVI icon.	106490
Gallery	Studywiz_English_ Crestwood - Gallery Slideshow - Multi School	111904
Gallery	Gallery - Add support to the gallery/slideshow. Support for more variations of jpeg file extension added (jpeg, JPEG, jpg & JPG).	

Category	Summary	Incident
Game	Search For A Genius game appears twice in resource menu, even after being removed [Hampshire] Imported Games no longer add a new Game type to the list. CSV importer duplicating users	111534
Gmail Integration	When you import a user with the same username as an existing user, the system no longer creates a new gmail account rather than updating the existing one.	
Groups	When you navigate from the User Groups page in Tools to the Group page, the Tools tab stays selected When a user navigates from the Tools page directly to a Group page, the Learning tab is now selected.	
Groups	Dynamic Groups - Add All Users doesn't add all users User list now updates correctly when all users are added to a Group.	
Groups	Group members not displaying correctly	112617
Import/Export	Importing Groups - teachers not be assigned to groups Imported teachers without a user role set in the import are now added to Groups as Teachers.	
Import/Export	Resource packaging fails if resource content folder contains _swtypes folder when exporting a resource Resources packaging now works correctly, even if the _swtypes folder is present.	
Import/Export	Universal Connector - Firbank College Universal Connector updated to meet client's requirements.	110596
Import/Export	Importing a folder with resources gets a PU If an Activity import includes Activity types that are not enabled on the deployment, those activities are now ignored.	
Interface	Calendar "expiry date" field is in wrong place in IE6 The expiry date on recurring Calendar events now appears in the correct place in all browsers.	
Interface	Reporting LHS scrolling area broken in IE6 The scroll bar now appears in the correct place in all browsers	
Interface	eLocker - panel header & tab background doesn't display properly in IE6 eLocker interface now appears correctly in all browsers.	
Interface	IE6 - make sure Panel header works in QTI QTI panel header now works correctly in all browsers.	
Interface	Gmail icon updated to match skinpack The Gmail button icon now matches the skinpack	
Learner Profile	Learning Ladder - Viewing a learning ladder loses some of the studywiz header The Learning Ladder layout has been updated to work correctly with the 9.4 skinpack.	
Login/Logout	Authentication Type value changes after an import User account authentication settings are now retained on import.	
Login/Logout	Log into Elementary but Standard interface appears after clearing system cache and templates The correct interface now appears, even if the cache and templates have been cleared
